DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-12 and 22-25, drawn to article, classified in class 428, subclass 34.1.

II. Claims 13-21, drawn to method of using article, classified in class 427, subclass 421.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product such as painting the surface of a wall.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by

Art Unit: 1772

their different classification, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Garrett Davis on September 29, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
